Draw circles

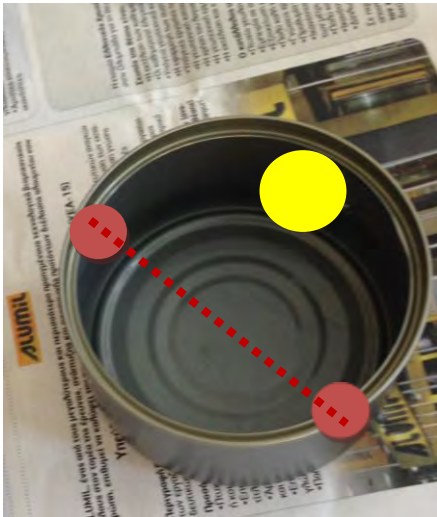

Cut paperboard circles

Use colored paper to decorate the can

Make three hole around the can using a metallic nail

The middle one (yellow dot) must be bigger so a pencil can fit.

Stabilize the pencil with paper tape

Pull the rope through the ceramic beads and the other side of the rope inside the metallic can.
Do the same on the other hole.
The bead should drop about the middle of the can.

Draw the circle paperboards as you like

Glue the coloured circles on each side

Enjoy!

How to make a Bookshelf

Take a box of the size you think will be good to make a bookshelf of. Remember that it has to be as large as you like, but big enough to fit books or decorative objects, for example depth:30cm, length:60cm, height: 90cm

Here is mine.

Remove and measure how far you want between the shelf and make a dash straight over where each floor begins.

Also measure how high you want every edge should be.

Funded by the European Union

Dress it with gift paper, cloth, tissue paper, etc. and decorate like you want on the outside. Fix two cardboard discs that will be like shelves measuring inside dimensions. Dress them if you want before you insert them.

Glue the small boxes or other storage if you want a top box. On the sides you can put pockets of cloth or elastic band for more storage if you want.
